SECOND EDITION OF:

CARDIOLOGY IN PRACTICE

What to know and how
to apply knowledge

Venue:

NH Eurobuilding Hotel
Madrid (Spain)

WELCOME LETTER

Like every 2 years since 1995, once again this year we are organizing our Cardiology State of the Art meeting, the aim of which is really to review what has taken place in Cardiology over the last 2 years. A nice meeting of controversial topics and review of the most recent published clinical guidelines.

The aim is not only to review but also to implement the knowledge accrued. For this, clinical cases and interaction with the audience are the perfect way to translate the verb “to know” to “to do”.

We are gathering together leading world experts to interact and provide these updates for the purpose of getting close to you. We trust that you will find it enjoyable, by asking difficult questions and receiving easy answers to be implemented in your daily practice, not only lectures or clinical cases, but also workshops where you can increase your skills in advanced imaging.

Finally, our most difficult cases in different modalities will be a challenge for you. Test your knowledge and be the new 2019 champions.

Now your time, Please send your questions in advance if you wish, and we will look forward to seeing you soon in Madrid.
